

BHARGAV K

Data Analyst | AI & Machine Learning Graduate

+91-8317410244 | kbhargav924@gmail.com | [LinkedIn](#) | [GitHub](#) | Bengaluru, India

PROFESSIONAL SUMMARY

Final-year B.E student specializing in Artificial Intelligence and Machine Learning, with a strong foundation in analytical thinking and problem-solving. Skilled in Python and machine learning techniques, with practical experience in data analysis, model development, and visualization. Interested in applying AI and data-driven approaches to solve real-world problems and enhance decision-making in fast-paced environments.

EDUCATION

B.E. in Artificial Intelligence & Machine Learning 2022 - 2026

GM Institute of Technology, Davanagere | CGPA: 8.8 / 10

12th — PCMB 2020 – 2022

Siddaganga PU College, Davanagere | 69.33%

10th — SSLC 2019 – 2020

Siddaganga High School, Davanagere | 86.68%

TECHNICAL SKILLS

Languages & Programming: Python, SQL (MySQL, PostgreSQL), C

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn

Tools & Technologies: Git, Jupyter Notebook, n8n, MongoDB

Analytics & BI: Tableau, Microsoft Excel, Exploratory Data Analysis (EDA), Data Cleaning

Machine Learning & AI: OpenCV, Convolutional Neural Networks (CNN).

Soft Skills: Problem Solving, Teamwork, Quick learner.

EXPERIENCE

Data Science Intern – EchoBrains (Jan 2026 – May 2026)

- Skilled in SQL, Python, Machine Learning concepts, data preprocessing, and data analysis through structured internship training..
- Gained strong theoretical understanding of data science fundamentals, followed by practical implementation in both mini and major real-time projects.
- Acquired hands-on experience in database querying, problem-solving, teamwork, project workflows, and applying analytical techniques on real datasets.
- This internship strengthened industry-ready technical and analytical skills, helping in solving real-world data-driven and business problems effectively.

PROJECTS

Loan Approval Prediction System | Python, Sqlite , ML, HTML, CSS, JavaScript 2026

- Built an end-to-end machine learning application to predict loan approval status, achieving ~90% prediction accuracy based on applicant financial and credit data.
- Engineered a structured data pipeline handling preprocessing, feature encoding, normalization, and train-test splitting on financial datasets, improving model efficiency and reducing training time.
- Designed and integrated a secure role-based authentication system (Admin & User) with SQL database support for storing and managing applicant records.
- Deployed an interactive dashboard that enables users to input loan details and receive real-time approval predictions with confidence scores and insights, enhancing usability for non-technical stakeholders.

Movie Booking Management System | Python, SQL, HTML, CSS, JavaScript 2026

- Developed a full-stack web application to manage movie ticket bookings, enabling users to browse movies, select showtimes, and reserve seats in real time.
- Designed and implemented a relational database using SQL to handle user data, movie listings, seat availability, and booking transactions efficiently.
- Built an interactive and responsive frontend interface allowing seamless navigation, seat selection, and instant booking confirmation.
- Integrated backend logic to prevent double booking and ensure accurate seat allocation, improving system reliability and user experience.

CERTIFICATIONS / ACHIEVEMENTS

- Machine Learning Internship Certificate — CodeAlpha (2025)
- Tableau for Beginners — Udemy / Coursera (2024)
- Python for Data Science & Machine Learning Bootcamp — Udemy
- Participated in Emerge, an inter-college hackathon.
- Participated in Ignitron, a 48-hour hackathon.
